Code for creating Table

```
create table product(
id int not null primary key,
name varchar(30),
price int
);

insert into product(id, name, price) values (27,'XNCB',198);
```

Code for creating Procedure
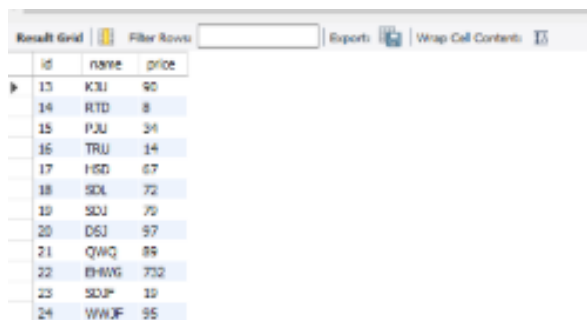

```
CREATE DEFINER=`root`@`localhost` PROCEDURE `pagination`(in pnumber integer, in
pagecount integer)
BEGIN

declare a int default 1;
set a = pagecount * (pnumber - 1);
select * from product limit a, pagecount;

END
```

Calling stored procedure

```
Call pagination(2,12)
```
